GitHub repository URL :

<https://github.com/Shubham-12bhatt/github-skills-challenge>

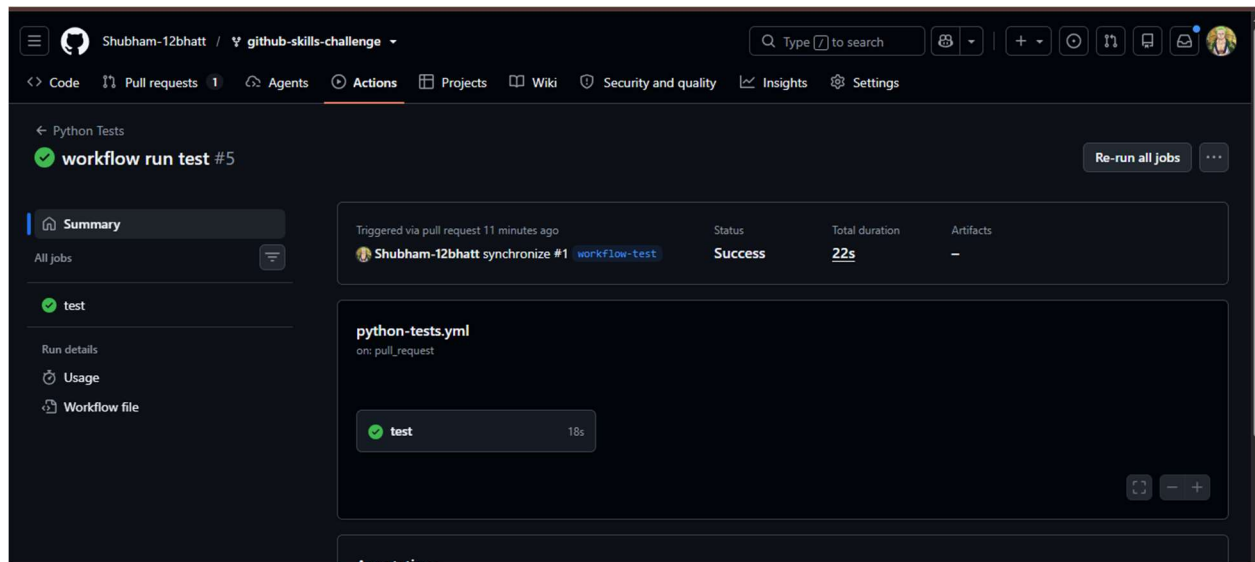

Pull request URL used to validate the workflows :

<https://github.com/Shubham-12bhatt/github-skills-challenge/pull/1>

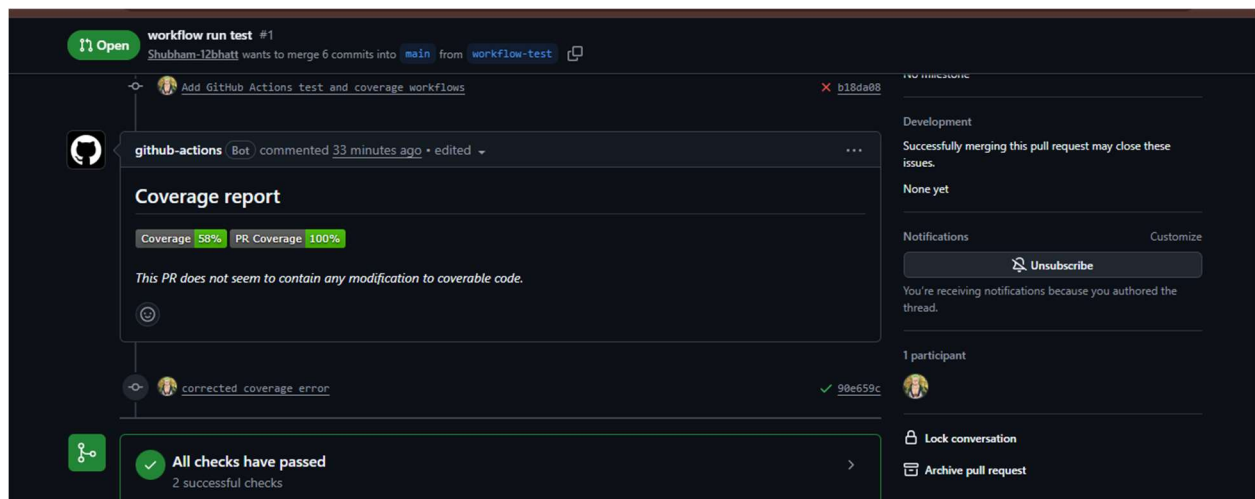

Screenshot showing the GitHub Actions workflows:

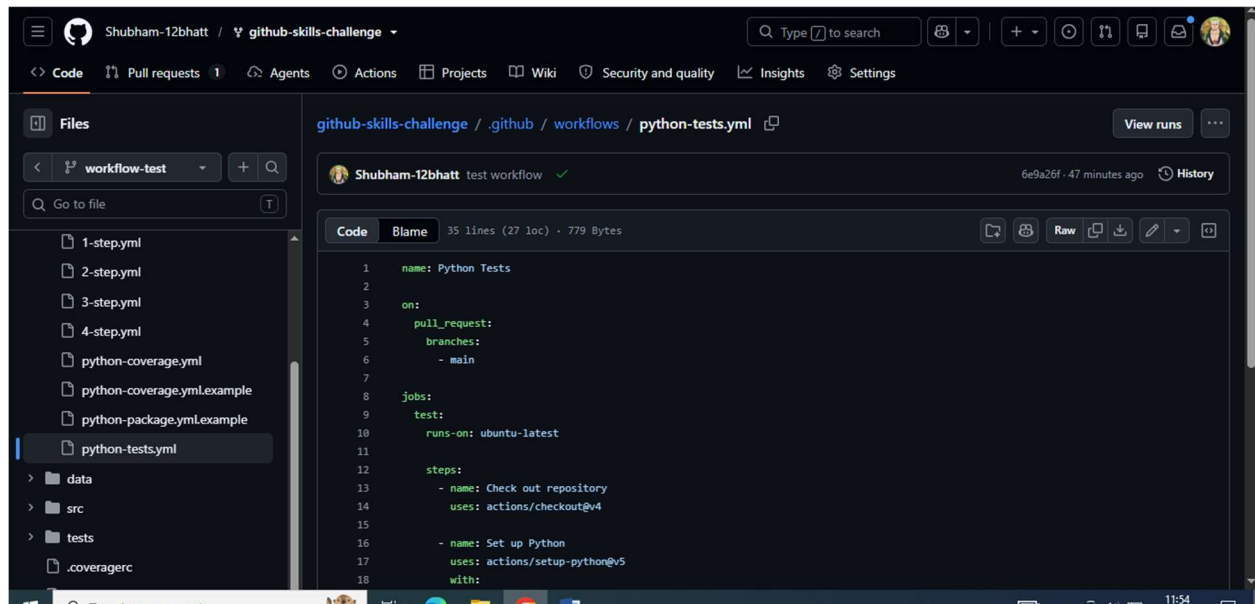

Screenshot showing a successful test workflow execution:

Screenshot showing the coverage result/comment on the pull request:

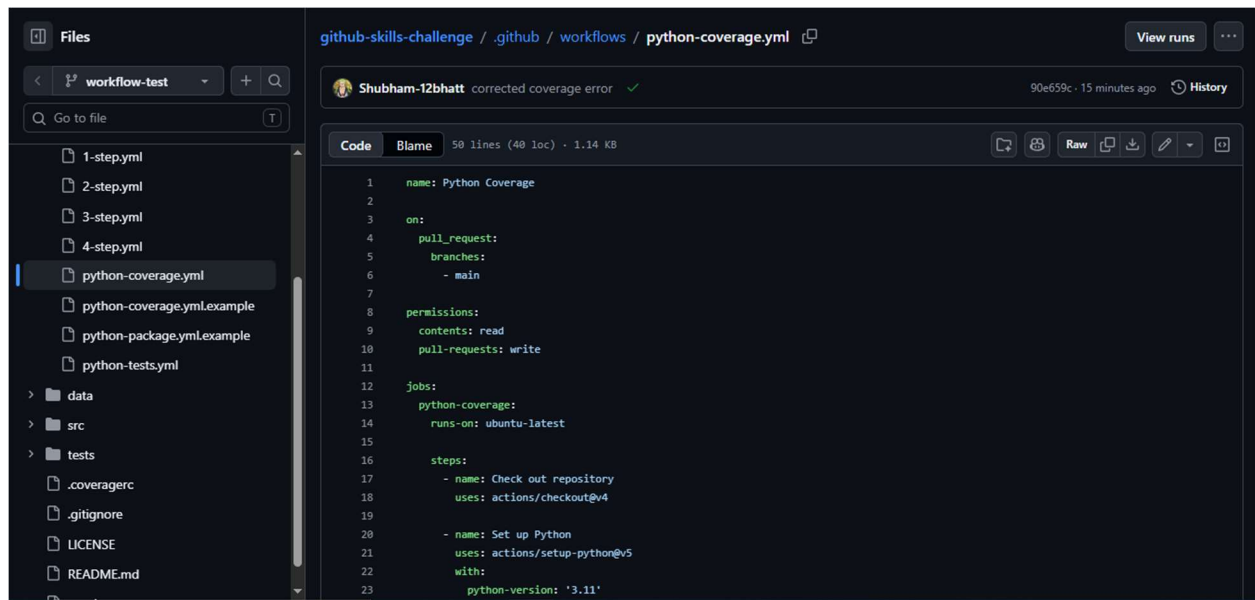

Screenshot showing the final repository/workflow files:

This screenshot shows the GitHub Actions workflow file `python-tests.yml` in the repository `github-skills-challenge`. The workflow is named "test workflow" and was last updated 47 minutes ago. It is triggered on a pull request to the `main` branch. The workflow consists of a single job named `test` that runs on `ubuntu-latest`. The job includes two steps: "Check out repository" and "Set up Python".

```
1 name: Python Tests
2
3 on:
4   pull_request:
5     branches:
6       - main
7
8 jobs:
9   test:
10    runs-on: ubuntu-latest
11
12    steps:
13      - name: Check out repository
14        uses: actions/checkout@v4
15
16      - name: Set up Python
17        uses: actions/setup-python@v5
18        with:
```

This screenshot shows the GitHub Actions workflow file `python-coverage.yml` in the repository `github-skills-challenge`. The workflow is named "corrected coverage error" and was last updated 15 minutes ago. It is triggered on a pull request to the `main` branch. The workflow consists of a single job named `python-coverage` that runs on `ubuntu-latest`. The job includes two steps: "Check out repository" and "Set up Python".

```
1 name: Python Coverage
2
3 on:
4   pull_request:
5     branches:
6       - main
7
8 permissions:
9   contents: read
10  pull-requests: write
11
12 jobs:
13   python-coverage:
14    runs-on: ubuntu-latest
15
16    steps:
17      - name: Check out repository
18        uses: actions/checkout@v4
19
20      - name: Set up Python
21        uses: actions/setup-python@v5
22        with:
23          python-version: '3.11'
```
